XS4ALL

'BOTNET CONVENANT' OF DUTCH ISP'S

What?

An effort to co-operate on abuse handling, focus on botnets in particular

An initiative of five major Dutch ISP's and OPTA

14 ISP's have now joined

Participants

Alice	Solcon
BBNed	Tele2
Concepts ICT	Telfort
KPN	UPC
Het Net	Xenosite
Luna	XS4ALL
Online	Ziggo

XS4ALL

Why?

3 reasons:

1. Abuse fighting is necessary
2. Pro-active to prevent regulation
3. PR: media attention creates awareness

People will have to get used to the idea that they are part of the problem and might get blocked if infected

How?

The pact consists of 2 things:

1. ISP's will filter / block infected customers
2. ISP's will share knowledge and information

Huh?

The pact consists of 2 things:

1. ISP's will filter / block infected customers

   Many ISP's already do this, others need time to organize their processes and systems to be able to do this

Huh (2)?

The pact consists of 2 things:

2. ISP's will share knowledge and information

Many ISP's already do this, mostly based on trust. New kids on the block will have to prove their value and trustworthiness

When?

XS4ALL

The pact was signed July

Major press coverage August

Filtering operational January 2010

Exchange of knowledge and info starts
February with initial symposium

XS4ALL

Questions?

ECP NL manages the pact
