

# Update on Registration Data Quality (RDQ) measurements

*Róbert Kisteleki*

*Science Group Manager, RIPE NCC*

*robert@ripe.net*

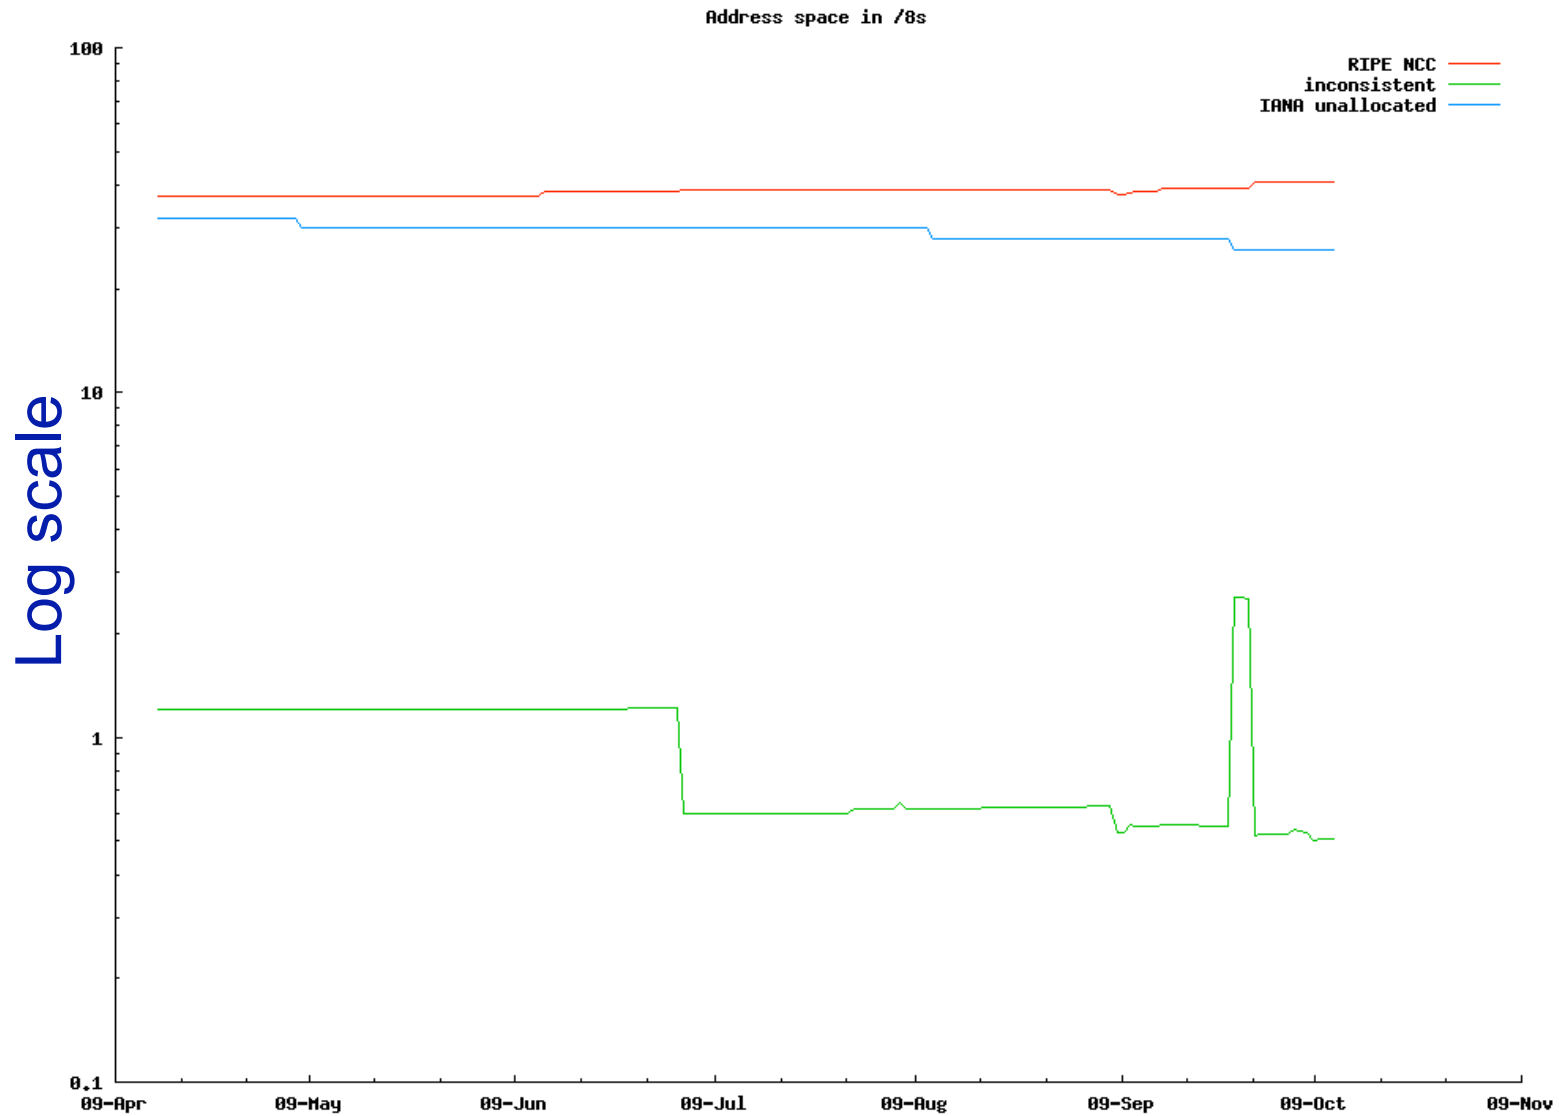

## Since May 2009

Major steps / events during the last half year or so:

- The measurement/detection system is in place, correction takes longer time and sometimes needs changes to tools and procedures!
- RIPE NCC Registration Services now have resources dedicated to this effort
- Corrections are being made continuously as well as in bigger batches (e.g. June 2009, see graphs)
