

Pending...

Dave Wilson
DW238-RIPE

Characteristics

- Specific to global policies
- Allows the policy to go back to discussion if a change is initiated in other regions
- Allows RIPE NCC/IANA to implement the policy if there are no further changes
- We may **speedily adopt a global policy, without causing delay** if proposal changes

Other approaches

- No change
 - ▶ possible that wording changes require the proposal to be resubmitted
- Only adopt when text reaches final stage in all regions
 - ▶ Makes RIPE process dependent on timing of processes elsewhere
